TECHNICAL SKILLS

Software
MS Word / Excel Adobe Premiere Pro Zoom / Google Meet

Language/ Framework
- C/C#/C++
- JavaScript
- Python
- HTML/CSS
- SQL
- Tailwind CSS
- Node JS / React JS / jQuery
- Bootstrap

DATABASES
- MongoDB
- SQL
- MySQL

TOOLS
- Git
- Github
- Amazon Web Services

Interests
- Problem solving
- Data structure and algorithms
- Web development
- UI/UX development

PROFESSIONAL EXPERIENCE

Seoul, South Korea
July 2013 - Sept 2013

ICN Consulting Group Administrator
- Collected personal data from potential employees and used Microsoft excel to create a database.
- Maintained and managed business website using CRUD method.
- Participated in daily scrum with the entire team to discuss and communicate objective of the day and identify any obstacle that could impact the work.

PROJECTS

E-COMMERCE WEBSITE

- Demo of a clothing shop website fetching data from open source API.
- Used React JS and Tailwind CSS to visually display new stylish fall fashion.
- Shopping bag function at the top right corner that displays a shopping cart onClick().
- Display automatic sums of the total price of all the items in the shopping cart.
- Remove item function from the shopping cart.

DELIEVERY SERVICE WEBSITE

- Navigation bar at the top of the page.
- Used Next JS, React JS and Tailwind CSS.
- Implemented framer motion library to animate motion of images.
- Modern looking website for any industry.

EXERCISE BROWSING WEBSITE

- Used React JS to demonstrate exercise browsing website with modern looks.
- Fetched API from an open resource .
- Implemented a search bar in which one can type in what type of exercise one craves. Displayed the result at the bottom of the page.
- When clicked, the website navigates to a separate part of the website in which further details and the video of the actual practice of the exercise is shown.

MODERN ADMIN BOARD

- Combined React JS with one of the most popular framework (Syncfusion) in the market to create an admin board that can be used in an actual business.
- Implemented customizable color and light mode for improved user's experience.
